
Gas Cylinder Shifting Cage

TEKLIFT manufactures Lifting Gas Cylinder Racks that come in standard and custom-made sizes. Our Racks are fabricated according to certified drawings and supplied with TUV Safety Certificate. Lifting Cylinder Rack is made of fully welded steel which can be used for both industrial and construction cylinder stand. It can store acetylene, argon, butane, carbon dioxide (CO₂), helium, hydrogen and nitrogen cylinders. Available in various cylinder capacities. 100% safe working structure.

Note: We can fabricate all customize sizes as per client request.
