
Floor Planner (Scarifier) Machine

Designed for use on all concrete and asphalt surfaces, the Flextool Scarifier TEK-FSP200 is engineered around durability and efficiency. With a 200 mm scarifying path, Honda GX160 4-stroke engine and rigid, heavy-weighted chassis design, the FSP-200 can roughen concrete surfaces and enable fast removal of thicker difficult film of coating, such as epoxy, to achieve successful bonding between the surface and binding material. The Flextool Scarifier TEK-FSP200 also comes with a tungsten carbide tip cutter cage
