
Concrete Block Cutting Machine TEK-BC Series

The TEK PROF 600 masonry block saw is a solid, precise machine, extremely compact and versatile. Much lighter than a normal block cutter. Direct drive system: saw cutting disc is mounted on the motor shaft with direct transmission of the motor power to the blade.
Designed for the building site, it is suitable for cutting blocks of concrete, natural stone, bricks, Poroton and other materials used in the construction sector.

It cuts with the head fixed and advancement of the carriage. Designed for blades of Ø600 mm. Equipped with a cooling system for the cutting disc: a pump for the circulation of water, positioned within the collection tank, allows water to flow onto the disc for cooling. The tank is emptied by opening the draining cap. Folding legs to facilitate transport.

Model	TEK-BC600	Blade/Holder Dia(MM)	Depth of cut(MM)	Length of cut(MM)	Voltage(V/Power(KW) Hz)	Speed(RPM)	Weight(kg)
TEK-BC600	Electric	600/30	230	320	400/50-60 4	1400	92

ACCESSORIES SUPPLIED: instruction manual, set of wrenches.
OPTIONALS: diamond blades, wheel kit for transport.
